EDUCATION

Government Engineering College, Thrissur

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.26

Thrissur, Kerala

2023-2027

EXPERIENCE

Product Intern (Full Stack Development & Mobile App Development)

May 2026 – June 2026

Exalture Software Labs Pvt. Ltd.

Ernakulam, Kerala

- Architected a thread-safe token generation and queue management engine using Node.js and PostgreSQL locks, supporting walk-in and scheduled bookings, automated state transitions, and wait-time estimation.
- Designed AI-powered recruitment workflows by integrating Google GenAI for candidate scoring, ranking, and interview scheduling.
- Built responsive React web apps and Flutter mobile features, including receptionist dashboards and real-time queue tracking with WebSocket synchronization via Socket.IO.
- Led the deployment and infrastructure configuration of backend services and web applications using Docker, Redis, and Vercel, ensuring reliable system operation and resolving production issues.

PROJECTS

Prawn Sentinel - IoT Water Quality Monitor

Oct 2025-Jan 2026

- Engineered a real-world IoT water quality monitoring system using ESP32, multi-parameter sensors, and a React/Firebase dashboard for real-time tracking, deployed under a government initiative.
- Implemented low-power data logging with deep sleep optimization, SD card storage, and WiFi-based retrieval to ensure reliable remote operation.

LexCheck - AI Legal Companion | [GitHub](#) | [Download App](#)

July 2026

- Built a cross-platform Flutter application integrating a Retrieval-Augmented Generation (RAG) pipeline to translate complex Indian laws into plain-language scenario analysis.
- Designed a highly scalable Node.js/FastAPI backend with Vector Database integration to ensure accurate, hallucination-free legal querying from verified datasets.

Aaroha - Recovery Support App | 2nd Prize, Hack@arch 4.0 | [GitHub](#)

March 2026

- Developed a comprehensive Flutter mobile application for addiction recovery featuring Riverpod state management, local Hive persistence, and OpenStreetMap integration.
- Integrated Groq AI (LLaMA 3.3 70B) to power context-aware mental health conversations, mood tracking, and crisis intervention workflows.

CyberRaksha - Cybersecurity Awareness Platform | [GitHub](#) | [Live Site](#)

December 2025-March 2026

- Built a full-stack interactive cybersecurity simulation platform using React, Express.js, and PostgreSQL, deployed across Vercel and Render.
- Designed a three-tier architecture featuring JWT authentication, role-based access control, and a gamified XP-based progress tracking engine.

TECHNICAL SKILLS

Languages & Frontend: Java, JavaScript, TypeScript, Dart, C, SQL, React.js, Flutter, HTML/CSS

Backend & Databases: Node.js, Express.js, Prisma, MySQL, PostgreSQL, Redis, Firebase

Cloud, Tools & IoT: Docker, Git, Vercel, Render, ESP32, Postman

AI Integration: Groq API, Gemini API, LLaMA 3.3, RAG Architectures

ACHIEVEMENTS

2nd Prize - Hack@arch 4.0 HackQuest Hackathon

March 2026

- Secured 2nd Prize for developing Aaroha, a multi-platform addiction recovery support app with AI companion features

NPTEL Introduction to IoT - Elite Certification

July-October 2024

- Achieved a score of 91%, ranking among the **top 2%** of all participants nationwide
